

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

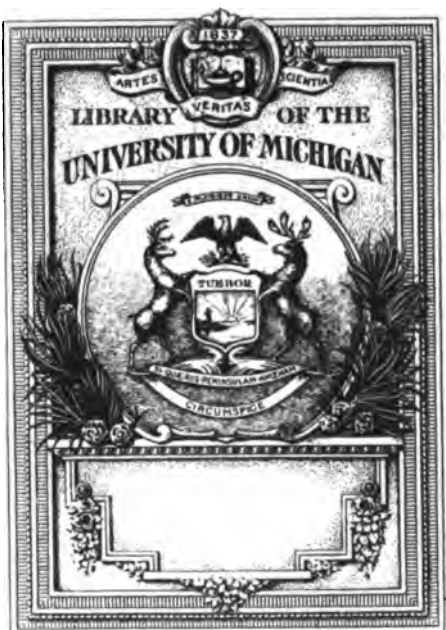

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

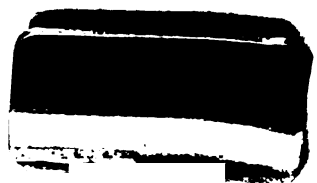

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# REPORT.

---

OFFICE OF THE STATE BOARD OF ASSESSORS,

TRENTON, N. J., October 30th, 1909.

*To the Legislature of New Jersey:*

Pursuant to the provisions of an act of the Legislature entitled "An act to revise and amend an act for the taxation of railroad and canal property, approved April tenth, one thousand eight hundred and eighty-four" (which revision was approved March 27th, 1888), and the various acts supplementary thereto, the State Board of Assessors herewith submits its Twenty-Sixth Annual Report, which report is, for the reasons previously stated, divided into two parts—Part I showing the valuation and assessment of railroad and canal property, with the statistical tables and other information relating thereto; and Part II showing the assessments levied against miscellaneous corporations organized under the laws of the State of New Jersey, and also showing the assessment and apportionment of the franchise taxes levied under provisions of Chapter 195, Laws of 1900, and supplements, upon corporations using the public streets or highways.

## RAILROADS AND CANALS.

In the assessment for the year 1909 of property used for railroad and canal purposes, there have been found one hundred and seventeen railroad corporations and one canal company subject to taxation under the act; the particulars and details of which assessments are fully set forth in Schedule A of the Appendix to this report; which Schedule also gives in detail the items of "second class" railroad and canal property and the tax levied thereon at the full local rates of each municipality wherein such property is located.

There was but one new corporation added to the tax list of 1909, viz.: the Pohatcong Railroad Company.

The Barnegat Railroad, which had for a number of years been operated by a private corporation, was abandoned by the operating company; consequently the assessment was re-transferred to the owners of the plant, viz., the Pennsylvania Railroad System, and the assessment against the Barnegat Railroad for the year 1909 will be found classified under the head of "Pennsylvania Railroad System."

#### REVALUATION OF RAILROAD AND CANAL PROPERTY.

Under the act of April 10th, 1884, and its supplements, the duty of assessing property used for railroad and canal purposes was delegated to a State Board of Assessors, presumably composed of representative citizens of the State—men as to whose probity there could be no question, and who, from the time of the passage of the original act, with the various changes in the personnel of the Board, have conscientiously endeavored to perform the duties for which they were appointed.

There have, however, from time to time, arisen criticisms as to the work of this department in the performance of the duties assigned them. Despite the fact that there have been various and numerous changes made in the personnel of the Board, there are now and always have been charges made that railroad property is under-valued, and thereby under-assessed. So strenuous have been these charges and allegations as to under-valuation and under-assessment that the Legislature of 1909, by Joint Resolution No. 3, provided that "Whereas, No new and complete inventory of railroad and canal property in the State of New Jersey has been made since the year one thousand eight hundred and eighty-six; and Whereas, It is desirable to have a present complete inventory made for the information and use of the people of the State, the Legislature, the State Board of Assessors and the State Board of Equalization of Taxes."

It was therefore resolved that a commission of three competent persons should be appointed for the purpose of making a revaluation of all railroad and canal property in the State.

As a matter of fact, there was "no new and complete inventory of railroad and canal property" made *in the year one thousand eight hundred and eighty-six*. It is further true, as a matter of fact, that since the year *one thousand eight hundred and eighty-four*, when there was "a complete inventory of railroad and canal property" made, there have since been made from year to year, and year by year, engineering examinations of the properties of the various railroad companies. In other words, while there has been no *complete inventory* made, as a *whole*, since 1884, yet, since that time, through the Engineering Department of the State Board of Assessors, there have been annual supplemental inventories made, with the resultant revaluations and re-assessments thereon of the properties of the various railroad corporations in the State of New Jersey.

Under provisions of Joint Resolution No. 3, above referred to, it is provided that a commission of three competent persons appointed by the Governor shall proceed to make a revaluation of all railroad and canal property in the State used for railroad and canal purposes, the result of their work to be submitted to the Governor, for the information and use of the people of the State, the Legislature, the State Board of Assessors and the State Board of Equalization of Taxes. In pursuance of this resolution, the commission was appointed, and whatever the results of their investigations may be, if such results are acceptable to the Governor and to the Legislature, they will be likewise acceptable to this Board. Up to the present time, there has been no report made by this commission which would in anywise affect the assessment of railroad property as levied by the State Board of Assessors. In the absence of such report, and in view of the fact that under the statutory law, the assessment of railroad and canal property by the State Board of Assessors is required to be completed on or before November 1st of the current year; and in view of the further fact that this Board, in its assessment for the year 1909, has found and levied taxes upon additional property used for railroad purposes to the amount of about \$7,000,000, the question naturally arises as to whether the State Board of Assessors has been so derelict in its duties as would seem to be implied by the charges made as to under-

valuation and, per consequence, the appointment of a commission to practically revise its work. In any event, the commission appointed under Joint Resolution No. 3 had not, up to November 1st, 1909, made any report, so far as we are advised, which would affect the assessment levied by this Board for the year 1909.

It may be that this Commission will do good work; it may be that they will, perhaps, discover properties which have been inadvertently omitted from our assessment, but the State Board of Assessors does insist that the work of valuation and assessment of railroad property has been scientifically and conscientiously made, having in view at all times the question of equity as between the corporations assessed, the State, and the various municipalities of the State.

The Board further submits, in answer to many criticisms, that the assessments throughout the State of property *other* than that of railroad and canal corporations during a term of years (say twenty years), have more than doubled, whereas the assessments levied by the State Board of Assessors upon *property used for railroad and canal purposes* have not appreciably increased—that these criticisms are fallacious. In the year 1889 the assessment of property “used for railroad and canal purposes,” levied by the State Board of Assessors, was the sum of \$197,643,818, and for the year 1909 was \$279,059,611, an increase of \$81,415,793, or more than 41 per cent.

There is one other fallacy in the comparison of the assessment of “property used for railroad and canal purposes” with other property of the State, and that is on this point: the increases in the general tax levy are very largely due to the building of new structures, the laying out of farm lands into town building lots and the construction of towns upon such lands, whereas the assessment of railroad and canal property is exclusively confined to a fixed quantity, a strip of land not exceeding one hundred feet in width, extending between its termini, together with the lands necessary for terminal yards, and as to which properties there could positively and absolutely be no improvement, except by reason of destruction of old structures and the erection in lieu thereof of new structures

located within the right of way or terminal yards. In other words, there are practically no changes made in property of this class from year to year except for the betterment of railroad service, all of which betterments have been included by the State Board of Assessors in its valuations and assessments. *New railroads* in our State are not frequently constructed, whereas, on the contrary, whole towns and villages are annually built and subjected to local assessment, so that there is no analogy whatever between the increased assessments of the property of individuals and the property *used* directly and absolutely for *railroad purposes*.

## ASSESSMENT OF 1909.

The following is a summary of the valuation and assessment of railroad and canal property for the year 1909:

Assessed valuation of main stem and franchise, .....	\$176,044,200 00
Assessed valuation of tangible personal property necessary for and used in State commerce, .....	29,990,265 00
Total assessable for State uses, .....	\$206,034,465 00
Assessed valuation of real estate used for railroad purposes other than main stem, .....	73,025,146 00
Aggregate assessed valuation, .....	\$279,059,611 00
Tax for State uses at average tax rate of \$1.808 per \$100 valuation, .....	\$3,725,103 14
Tax for uses of taxing districts on real estate used for railroad purposes, other than main stem, at full local rates, .....	1,324,992 01
Total tax, .....	\$5,050,095 15

The above statement, as compared with the similar statement for the year 1908, shows an *increase* in the valuation of property used for railroad and canal purposes to the extent of \$6,779,621 and an increase in tax to the corporations of \$388,563.23.

Under existing laws *all* of the tax levied upon "second class" railroad property is collected and remitted by the State Comptroller directly to the taxing authorities of each of the municipali-

ties wherein such property is located; and, additionally, all of the tax levied upon "main stem" (including franchise) and tangible personal property at the average tax rate of \$1.808 per \$100 valuation in *excess of one-half of one per centum* is apportioned to the maintenance and support of free public schools. So that the State government for its uses and for governmental purposes is restricted in its proportion of revenue arising from railroad taxation to one-half of one per centum upon "first class" railroad property (main stem, franchise and tangible personal property). In other words, out of the above assessed tax of \$5,050,095.15 (when collected) the State will retain for *its* uses \$1,030,172.33 and allot to the municipalities the sum of \$4,019,922.82.

#### FINANCIAL STATEMENT.

The capital stock and debt as reported are as follows:

Capital stock, .....	\$186,257,580 00
Funded debt, .....	223,663,112 00
Unfunded debt, .....	13,304,046 74
Total, .....	<hr/> \$423,224,738 74

The gross earnings of all lines for the year ending December 31st, 1908, were \$74,736,654.27.

The customary tabular statements concerning the assessment of railroad and canal property for the year 1909 will be found in the appendix to this report.

Respectfully submitted,

DAVID BAIRD, *President*,  
 THEODORE STRONG,  
 O. C. BOGARDUS,  
 CHARLES E. HENDRICKSON, JR.,  
*State Board of Assessors.*

IRVINE E. MAGUIRE, *Secretary*.
